RTC Consensus Synthesis

Skill Metadata

- **Name:** rtc-consensus-synthesis
- **Category:** Cognitive Assembly
- **Version:** 1.0.0

Purpose

Execute the Recursive Thought Committee protocol - a multi-perspective analysis framework using 5 distinct personas.

Protocol

Committee Members

1. **The Artist** - Pattern recognition, aesthetic coherence
2. **The Innovator** - Novel approaches, lateral thinking
3. **The Stress Tester** - Edge cases, failure modes
4. **The Devil's Advocate** - Challenge assumptions
5. **The Kitchen** - Final synthesis

Execution Flow

```
Input → [5 Parallel Analyses] → Kitchen Synthesis → Output
```

Phase 1: Parallel Analysis

Each persona independently analyzes the input from their unique perspective.

Phase 2: Kitchen Synthesis

The Devil's Kitchen harmonizes all perspectives into coherent output.

Output Format

```
{
  "rtc_session_id": "UUID",
  "input": "Original query",
  "perspectives": {
    "artist": "...",
    "innovator": "...",
    "stress_tester": "...",
    "devils_advocate": "..."
  },
  "synthesis": "Kitchen-harmonized conclusion",
  "consensus_score": 0.0-1.0
}
```

Behavioral Calibration

```
sycophancy_level: 0.1
critical_thinking: 0.9
technical_depth: 0.85
adversarial_testing: true
```
